Facilities

Policy 7113

Retirement of Buildings

A building operated and maintained by the school district may be retired from use when the Board of Education determines that it is no longer useful to the district and/or is unsuitable to the current needs or projected needs of the district. The facilities plan for the district should be the base for considering the closing of a facility, and should require additional study of the possibility of remodeling the facility for multiple purposes or alternate considerations for use by the district. To evaluate these decisions, The Board of Education will follow processes outlined in its Bylaws 9130. When a building is retired from use, it shall be returned to the Town and shall no longer be operated or maintained by the Board of Education.
